Whether you are using a PC or notebook, it is inevitable that at one point or another, you will have to replace the system's hard drive. Most of the time, this is a relatively straightforward task. However, some computers, such as routers, NAS devices, and network attached storage (NAS) devices, are not only essential to your daily operation, but can be hard to replace since they are often built in to a larger unit such as a network cabinet or rack. The last thing you want to happen is lose your router, and there is really no substitute for having your network up and running. In this case, you have no option other than to call on the services of a professional that can replace the hard drive of your desktop router. The only thing you need to do is evaluate your router's warranty so you will know whether you can receive assistance from your supplier to replace your router hard drive. **Warranty Expires** Some routers come with a standard 1-year warranty from the manufacture, but many routers also offer a number of different add-on services which can improve the longevity of your router and help you to choose the best router for your needs. Some of these services include free backup, free virus protection, and free technical support. You can learn more about the different add-on services that your router offers in order to extend the lifespan of your router by checking the manufacturer's website or contacting their technical support staff for information about these services. To make sure that you can receive free backup, virus protection, and technical support from your router manufacturer, you will need to learn about your router's warranty. **Router Warranty Info** In this article, we will learn more about the warranty that routers provide. While this can vary depending on the make and model of your router, you will likely be able to find all the information you need by reading the information that is included in the manual. The first thing you will want to do to learn about your router's warranty is to follow the manufacturer's instructions for looking up or printing the warranty document. Most manufacturers have an official support website where you can locate warranty info, and they will likely also give you a document to print or download which you can then use in the event of a warranty claim. All routers include a service manual. This document is typically available for download from the manufacturer's website, and is a quick way to find

But I'm surprised they didn't do a modded RC up there in the booth instead of a DSE and One-off from SD. I mean, I know SD is trying to get back into the RC game, but IMO building a a DSE of a RC (instead of a DSE of a RX) would've been much better IMO. Spigot. You knew the first thing I was going to say to the preview they did were going to be without any two placekickers.Recanalization after intravenous thrombolysis for acute ischemic stroke is not associated with outcome. Intravenous thrombolysis has been increasingly used in the management of acute stroke. Because recanalization is thought to be beneficial in the subgroup of patients with persisting or progressing symptoms from a thrombotic occlusion, it was hypothesized that recanalization after intravenous thrombolysis is associated with a better outcome. On the basis of a prospectively gathered registry of all patients with acute ischemic stroke treated with intravenous thrombolysis in 9 stroke centers between 2000 and 2006, a total of 727 patients were included in this study. None of them had received intravenous recombinant tissue plasminogen activator before or had been treated as eligible for intravenous thrombolysis.

Freeware, portable, small size, all-in-one solution to Decrypt, Locate & Remove/Make Backup of PC. A clone of a popular open-source program with all the goodies. Automatically scans and finds encrypted files. Can remove the lock from files and decrypt them. Removes files that are corrupted. Can restore files from backup/cloned drive. Apart from how to decrypt your files, it is also best to keep a backup of them for future needs. You can restore a backup that you had made earlier in case a similar ransomware got installed, and even restore files that were deleted or mistakenly moved from one location to another. To make a backup, this tool allows you to save everything in one spot and you don't need to scramble to find individual files one by one. All you need to do is scan your computer for encrypted files, select the files you want to backup and save them to your desired location. You can also set a scheduled backup, which will be set to run daily and make a backup of your files. Ideally, you should make a backup at regular intervals and store it offline. Apart from having a copy, you can also restore files in case you get hit by a ransomware. Mole02 Decryptor can do all of that. It automatically finds all the files that are encrypted by the Mole02 ransomware, makes backups and decrypts them. If you are unable to decrypt files on a second attempt and the utility claims that your files are corrupt, it will scan through a list of possible causes and display files that could be the ones that are corrupted. The utility allows you to restore all the files that you had backed up earlier. Once that's done, all your files should be back where they were before the ransomware got installed. The best part about this software is the fact that it is free to use. There are no hidden fees and no registration is needed. The utility does come in some handy presets, which can be set when needed. The software also doesn't make any unnecessary changes to your PC and it works quietly in the background. If you are planning on making any changes to your computer, it's probably best to do that in a safe environment, and that way you can be certain you won't accidentally overwrite anything important. Mole02 Decryptor is an open source tool available for Windows. It'

Full article The Final Post, Tagged & Lists The last week has been crazier than usual. Between finding my driver's license while drunk in Atlantic City, dealing with the holidays alone, and, of course, work, I barely had time to sleep a few hours a day. I'm happy for that because my writing schedule got pulled completely out of whack. The consequence? Less blogging for you guys. That is about to change starting today, though. Along with the new year I'm also graduating this year and doing some thinking about my next step. In the meantime, I have some good news, things from Supernatural I missed in previous years. The final post in the 5th year tag is titled: Perfection is never attained, only pursued. Now, some of you may know the source of this lyric, but I don't. The source of this lyric remains a mystery to me, so please don't argue about it with me. I will leave you to debate the significance of this lyric with each other. Personally, it reminds me to stop and actually appreciate the world around me, which is somewhat crazy to say given the state of the world. With that said, I have a few things to make up for. Here are my lists and tags for 5th year: Posted Tags Leave a comment with your favorite tag. You can choose up to ten items. 1. Music 2. Writing 3. Artists 4. Enthusiasts 5. Games 6. Friendships 7. Places 8. People 9. Memories 10. Imagination Lists 1. Books 2. Movies 3. TV Shows 4. Genres 5. Emotions 6. Food 7. Fashion 8. Music 9. Video Games 10.
